Partnership for reforms and change

From 2022 to 2025, Switzerland and Albania will engage in a reform- and results- oriented cooperation programme. Quality of implementation will be a key principle of our joint work. A proper implementation of reforms will improve Albania's democracy, rule of law, business climate, and living conditions for citizens. Our work will also contribute to Albania's European integration – based on European standards and values - and the achievement of the Sustainable Development Goals (SDGs).

Swiss Cooperation Programme in Albania 2022-2025 contributes to:

- a functioning democracy, effective institutions and public services
- a sustainable, inclusive and competitive market economy
- climate change mitigation
- achieving and implementing European standards and values

Four thematic areas

Switzerland's support to Albania for 2022-2025 focuses on **four thematic areas** and amounts to 105 million Swiss francs (CHF).

Democratic governance

People benefit from inclusive, effective and democratic institutions

37
million CHF

Expected results:

- Efficient and inclusive** services from local institutions
- Improved functions** of the Parliament and municipal councils
- More engagement** and action by citizens in decision-making

Economic development and employment

People contribute to and benefit from sustainable economic growth, more business opportunities and decent jobs

35
million CHF

Expected results:

- An improved macroeconomic framework** that leads to more resilience, better services, and more trust for consumption and investment
- A better business environment** for more competitiveness, productivity, investment and employment
- Improved employability** of (young) people through labour market skills and services

Infrastructure services and climate change

People benefit from improved access to sustainable economic infrastructure services and from addressing climate change and its effects

18.5
million CHF

Expected results:

- **Reliable and affordable** drinking water, wastewater and waste management services provided by effective institutions
- **Authorities manage energy sustainably** to mitigate climate change and make cities and communities resilient to natural hazards

Health

Empowered citizens have equitable access to quality health services

11.5
million CHF

Expected results:

- **Healthier lifestyles** and an environment that is conducive to health
- **Improved primary healthcare services** and more resilient emergency services

Budget for thematic areas

Democratic governance

37000000

Economic development and employment

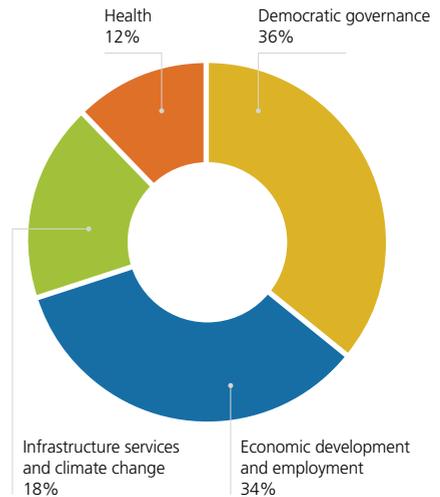

35000000

Infrastructure services and climate change

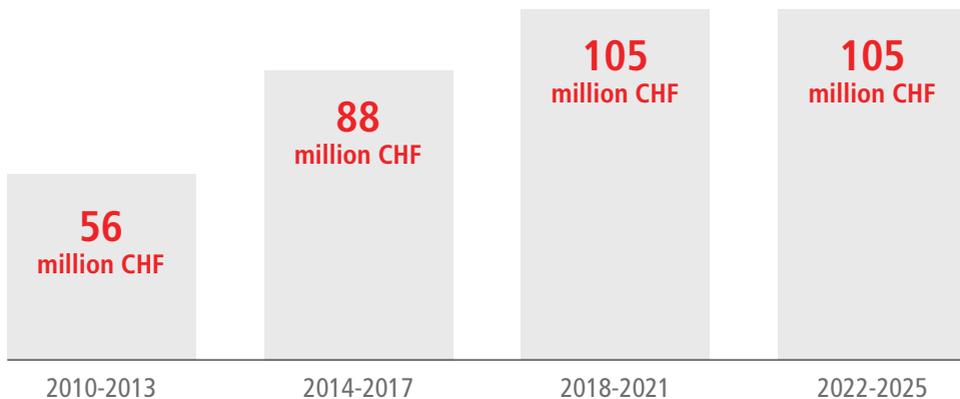

18500000

Health

11550000
