An adventure on land, out of time, in the dead of winter with a camel caravan, The Spatial odyssey is an exploration of an open-air museum of human and natural history that will take you into the realm of space, light and liberty of Mongolia.

Besides a cultural journey, it is an extraordinary ascent of eras and of 20 millennia from the contemporary to the paleolithic ages telling the fascinating history of the empires that ruled the vast territories covering Central Asia, Siberia and Mongolia.

A journey across a harsh but beautiful land, bereft of borders and fences, where from the origins nomads migrate freely from the present to the past, slowly drifting with the progress of their caravans.
