### The Alphorn Trio of La Béroche

On the shores of Lake Neuchâtel, in La Béroche, three friends founded the alphorn group "Alphorntrio de La Béroche" in 1992. The group grew bigger and bigger and is now a trio in name only. They have been finalists several times at the international alphorn competition in Nendaz (VS). The four members present have performed on the Great Wall of China and in Shanghai. They are accompanied by a talented flag thrower who is one of the few women who excel in this discipline.

### IDIAP Research Institute

The institute has been a leader in the field of artificial and cognitive intelligence since 1991. Founded by the city of Martigny, the canton of Valais and EPFL, among others, it is mainly active in areas such as speech and visual perception, machine learning, human-machine interaction and robotics. Its activities include theoretical and applied research as well as technology transfer in the field of artificial intelligence.
